

Project data protection with FluentPro Backup

The daily work of an IT administrator comes with its own set of challenges. Digital project management is demanding, and preserving immense amounts of critical data is crucial to success. When managing sensitive information, human errors can happen at any time and lead to irreversible consequences, such as:

- Data loss.
- Document corruption.
- Stalled projects.
- Negligence claimed by clients.
- Financial and productivity loss.

To prevent the devastating effects of lost data on company project management systems, FluentPro has created project backup and restore software: FluentPro Backup.

Supported systems

How FluentPro Backup helps customers

FluentPro Backup is a cloud-based backup and restore platform for project data. It is specifically designed to work with Office 365 Planner, Microsoft Project for the Web, Dynamics 365 Project Operations, Monday.com, Trello, Asana, and Smartsheet. It also provides automated backup and restore for Microsoft Dataverse table data.

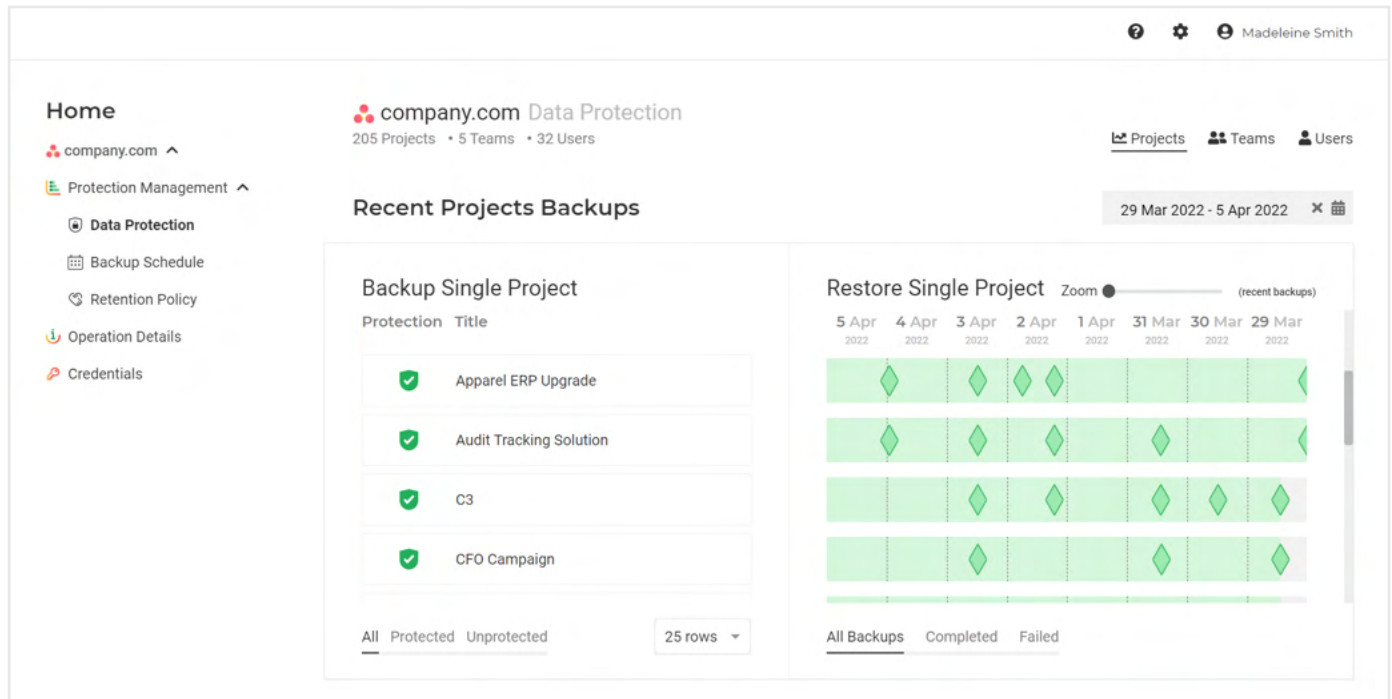

The screenshot displays the 'Operation Details' page for 'company.com'. The page shows a summary of 205 Projects, 5 Teams, and 32 Users. A table lists several backup operations, all of which are 'Completed'.

Title	Operation Type	Start	Finish	Status
Completed Project(s): 2/2, Team(s): 1/1	Backup	03/29/2022 10:14 PM	03/29/2022 10:15 PM	Completed
Completed Project(s): 1/1, Team(s): 1/1	Backup	03/29/2022 06:14 PM	03/29/2022 06:15 PM	Completed
Completed Project(s): 2/2, Team(s): 1/1	Backup	03/29/2022 02:14 PM	03/29/2022 02:17 PM	Completed
Scheduled backup: No modified items found	Backup	03/29/2022 10:45 AM	03/29/2022 10:46 AM	Completed
Completed Project(s): 99/99, Team(s): 4/4	Backup	03/29/2022 10:37 AM	03/29/2022 10:43 AM	Completed
Scheduled backup: No modified items found	Backup	03/29/2022 10:14 AM	03/29/2022 10:14 AM	Completed
Scheduled backup: No modified items found	Backup	03/29/2022 06:14 AM	03/29/2022 06:15 AM	Completed

FluentPro Backup runs on the reliable, stable, and secure Microsoft Azure platform to provide robust data protection in project management systems. With this software, your organization can:

- Develop a backup schedule.
- Conduct an on-demand backup.
- Set up continuous automated backup.
- Perform a complete or partial backup.
- Restore project data automatically.
- Fix damaged data from a backup copy made previously.
- Backup tasks, groups, projects, and resources.

These features protect your data from accidental deletion or other damage. All critical data can be restored in an emergency with just a few clicks.
